Professional Summary

CS undergraduate (top 5% **Kargil Batch**, Chandigarh University) building secure, scalable backend systems with Java, Spring Boot, and React.js. Shipped full-stack apps with JWT auth, real-time messaging at **100+ concurrent connections**, and **10+** REST APIs. Published research at **CSR 2026**; solved **400+** DSA problems. Seeking an SDE role to build reliable, scalable software.

Education

Chandigarh University – B.E. Computer Science – CGPA: 7.4 2023–2027
Diksha International School – Intermediate (CBSE) – 75.2% 2022
St. Xavier's School – Matriculation (ICSE) – 84.8% 2020

Technical Skills

Languages: C++, Java
Frontend: Javascript, React.js, Tailwind CSS
Backend: Spring Boot, Spring Security, Spring Data JPA, REST APIs, JWT, Hibernate
Database: MySQL
Core CS: OOP, DBMS, Operating Systems, Computer Networks
AI: Generative AI Fundamentals, LLM Concepts, AI-Assisted Software Engineering
Tools: Git, GitHub, Postman

Projects

Campus Second-hand Marketplace May 2026 GitHub

- Developed a full-stack marketplace platform for students to buy, sell, search, and manage second-hand items within the campus community.
- Implemented JWT-based authentication and role-based authorization using Spring Security and designed **10+ RESTful APIs** integrated with a React.js frontend.
- Structured the backend using a **3-layer architecture** (Controller, Service, Repository) for modularity and maintainability.
- **Tech:** Java, Spring Boot, Spring Security, React.js, REST APIs, JWT, MySQL, Maven.

Real-Time Chat Application Apr 2026 GitHub

- Developed a full-stack real-time chat application using Spring Boot, WebSocket, STOMP, and SockJS, supporting **100+ concurrent connections**.
- Implemented asynchronous bidirectional messaging and instant message broadcasting using WebSocket endpoints and Spring Messaging.
- Built a responsive React.js frontend for seamless real-time communication.
- **Tech:** Java, Spring Boot, WebSocket, STOMP, SockJS, Spring Messaging, React.js.

Smart Irrigation System Mar 2025–Apr 2025

- Developed an IoT-based smart irrigation system using ESP32 and the Blynk IoT platform.
- Automated water pump operation using soil moisture thresholds (below 30% ON, up to 80% OFF).
- Integrated DHT11 temperature/humidity and soil moisture sensors with a relay-controlled water pump.
- **Tech:** ESP32, Blynk IoT, DHT11, Soil Moisture Sensor, Relay Module.

Achievements

- Solved **400+** Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
- Secured **3rd Position** in a college-level DSA Hackathon.
- Published a research paper at **CSR 2026** and secured **2nd Position** in the conference presentation.
- Selected for the **Kargil Batch**, consisting of the **top 5% students** of the university based on coding skills.
